Heating, Ventilation, Air Conditioning and Refrigeration-HVA

The mission of the Heating, Ventilation, Air-Conditioning and Refrigeration program is to provide the highest quality technical training and job skills for area residents, industrial institutions and also individual training needs, including those persons already employed in this field. The heating, ventilation, Air Conditioning and Refrigeration program is an individual program that prepares individuals to work in a variety of jobs in the field of residential and light commercial air conditioning and refrigeration.

Program Outcomes: Upon completion of the program, graduates are prepared to troubleshoot, repair, and maintain residential and commercial refrigeration; air conditioning; heat pumps; humidifiers; and electrical and gas heating. Graduates also understand the fundamentals of electricity, electric motors, and controls. Graduates of the program will be able to install and braze refrigeration tubing, diagnose electrical problems; install duct systems; repair light commercial equipment; recover air conditioning and refrigeration refrigerants; locate and repair leaks.
