

## TCAT Upper Cumberland Cost Sheet 2026-2027

### Collision Repair Technology

The mission of the Collision Repair Technology Program is to train students for employment in the field of Collision Repair and Refinishing. The Collision Repair Technician program is designed to provide the student with a thorough understanding of the materials, methods, and refinishing techniques used in the repair and restoration of a damaged automobile body. Through class study, audiovisual presentations, and actual "hands-on" performance tasks the student will learn the procedures necessary for the proper repair and refinishing of metal, fiberglass, and plastic components used in both unibody and conventional automobile construction.
